Monthly Competition Rules

These rules apply to competitions from 1st February 2022

Aim

To encourage members to improve their photography through participation in regular competitions.

Eligibility

All financial members of the Club are eligible to enter monthly competitions.

Types of Competitions

In each month from February to October there are two competitions: Print and PDI (Projected Digital Image). The Print competition is held on the second Thursday of each month and the PDI competition is held on the fourth Thursday of each month.

Each competition has two grades – A Grade (for more experienced photographers) and B Grade (for less experienced photographers, or photographers that are not experienced with entering competitions).

Within each grade there are two sections – Open and Set Subject. A list of Set Subjects is provided at the beginning of the year and photographers are expected to enter images that are inspired by the current month's subject. In Open competition there are no constraints on the subject matter provided that the images are the work of the photographer and conform to the Ethical Guidelines ([link](#)).

In addition to the graded competitions, there is an additional section – Image Critique. In this section photographers may enter images for feedback to be given by the judge without the competitive element. This provides a means for photographers to receive feedback and constructive criticism on their images.

Judging and Grading

Judges are asked to assess each image with regard to artistic merit, creativity, imagination, impact, emotion and story where relevant. Technical quality of an image is important, but it should not override the consideration of its artistic merit. Judges are also asked to comment briefly on each image.

Graded Competitions

Aims of B Grade Competitions

- To foster development of members' technical photographic skills.
- B Grade photographers generally have less exposure to photography, especially competitions, so benefit from technical and aesthetic guidance. Judges' comments should be aimed at helping the photographer develop both technical, composition, lighting and aesthetic skills.

Monthly Competition Rules

These rules apply to competitions from 1st February 2022

Aims of A Grade competitions

- To recognise photographic excellence.
- A Grade photographers are expected to produce photography of a high technical standard, but will benefit from a critique on the aesthetics, originality and creativity of their images.

Image Critique

Aim of Image Critique

- To provide encouragement to members who want feedback on their images without the competitive context.
- Entrants can be of any standard but typically are relatively new to photography or are experienced members experimenting with different techniques. They will benefit from both technical and aesthetic advice depending on the images entered.

Members' Grades

New members should start in the grade which is relevant to their experience so far – for example, beginning-intermediate photographers should start in B Grade. Experienced photographers will generally start in A Grade but this should first be discussed with the Competition Committee.

Note: Experienced new members that have had their photographic skills recognized by the Competition Committee under the section 'Promotions and Determining Grade of Members' below, start immediately in A Grade.

A member will have the same grade for both the Print and PDI competitions. And the same grade for both Open and Set Subject.

Entries

Rules for Competition Submission

A Grade and B Grade Open competitions (Print and PDI)

- one (1) entry per member in each competition

Set Subject competitions (Print and PDI)

- one (1) entry per member in each competition

Image Critique competitions (Print and PDI)

- up to five (5) entries per member in each competition, however if that member has also entered images in Open or Set Subject, then they are limited to one (1) entry in Image Critique

Judges
